WHEEL ALIGNMENT MACHINE

Ordering the API data product

Use of the Quick Guide and legal information.

Contents of the Quick Guide

This Quick Guide is structured as easily as possible to find the information you need. It shows the necessary steps for org. admins or market admins to apply for wheel alignment machine usage rights for an associated operation.

Within the document, you can navigate between chapters and topics using the links provided (indicated by the blue underlines).

Legal notice

Although this Quick Guide has been produced to the best of our knowledge and with the utmost care, errors and inaccuracies cannot be completely ruled out. No legal responsibility or liability is assumed for any remaining incorrect information and its consequences. The information contained in this Quick Guide corresponds to the current state of development and can be changed without prior notice. Future versions may contain additional information. Technical and typographical errors will be corrected in future versions. This Quick Guide and all copyrightable materials distributed with the product are protected by copyright. All rights are reserved by Mercedes-Benz AG. Without the prior consent of Mercedes-Benz AG, all materials that are eligible for copyright may not be copied in whole or in part or duplicated elsewhere. For lawful users of the product, this consent is deemed to have been granted under the contractual agreements. Copies of this Quick Guide or parts thereof must contain the same copyright notice as the original.

Advantages of using wheel alignment machine (WAM)

The WAM API serves as the central data source for wheel alignment measurement for all current passenger car model series. It offers:

- **Fast vehicle identification**
Vehicle identification in one step with FIN/VIN as the basis for accessing the specified suspension data.
- **Deviation analysis**
Evaluates measured actual values of the suspension based on the expected values to determine required **adjustments**.
- **Current specified suspension data**
Supplies the specified values and tolerances defined by the manufacturer for the suspension setting.

Technical requirements for ordering wheel alignment rights in XENTRY Shop

Technical requirements in oneAPI for ordering the WAM data interface via XENTRY Shop

The technical platform for connecting your chassis alignment system is oneAPI. For you, XENTRY Shop handles the ordering process in oneAPI up to and including approval.

The following conditions must be met:

- 1.) You have the necessary rights of use for oneAPI (org or market admin)
- 2.) You have created or own a Dealer team (in OneAPI) that includes at least 2 people (one of them you).

Link to oneAPI {Hub}- the API portal at Mercedes-Benz Group AG:

<https://developer.corpinter.net/>

Link to oneAPI documentation (for dealers):

https://dealer.oneAPIdocs.mercedes-benz.com/hub-dealers/05_introduction/reading/

Application for WAM usage rights

If you would like to use the **Wheel Alignment Machine** data supply for your wheel alignment system, you can place an order in XENTRY Shop for your company .

[Mercedes-Benz Retail Platform • Powered by Workvivo](#)

The rights of use for the wheel alignment machine can be obtained via the XENTRY Shop

Preliminary remark

Step 1: You own the necessary rights for oneAPI in Alice

Step 2: You create a dealer team in OneAPI (if it doesn't exist)

Step 3: You order in XENTRY Shop

Step 4: You log in to your chassis measurement system with the credentials you have received

Preliminary remark 1: Before ordering in XENTRY Shop, create a dealer team in oneAPI (if not already available; Teams in oneAPI can be used across all apps). The team must consist of at least two active members.

Important: To request rights of use for [Wheel Alignment Machine](#) ("subscribe" app), you need [Organization Administrator](#) "or" [Market Administrator](#) "rights". (Market administrator rights are mandatory if you want to order for all outlets in your market)

Preliminary remark 2: You are authorized to place orders for the Wheel Alignment Machine product in XENTRY Shop

Start

1

In oneAPI, select the ["TEAMS"](#) tab in the header navigation area to create a [team](#).

Before you order the product in XENTRY Shop, you need a team in oneAPI.

Creating a team

oneAPI

1 In the subsequent view, click on " [Create New Team](#) " (make sure you have selected a Dealer Team) and enter the name of your [team](#) (freely selectable). Click on " [CREATE](#) " to generate your team.

2 Please select your newly generated team from the list (here in the example: *Model Test*) and click on the *Edit Team* icon for editing: 

3 To invite a new team member, please enter the person's user ID.

4 By clicking on " [INVITE](#) ", the invited person receives an info in oneAPI. However, it is **not automatically** informed of the invitation by e-mail, but only by means of a symbol in the oneAPI header:  Request the person proactively (e.g. by email) to accept the **invitation** .

Important: Your [team](#) requires at least two active members who have the role of "[organization admin or market admin](#)" and are "[active](#)" members, i.e., have accepted the team invitation. The team must be a "Dealer" team!

The Wheel Alignment Machine product is ordered in XENTRY Shop

Wheel Alignment Machine > Wheel Alignment Machine

Wheel Alignment Machine

Für unabhängige Marktbeteiligte ist Wheel Alignment Machine nicht über XENTRY Shop oder oneAPI verfügbar. Unabhängige Marktbeteiligte wenden sich bitte direkt an die Hersteller der Fahrwerksmessanlagen. Wheel Alignment Machine ist die Lösung für die Fahrwerksvermessung, wenn Sie schnell und komfortabel auf Fahrwerks Solldaten zugreifen möchten. Mit Wheel Alignment Machine erhalten Sie den Zugang zu Fahrwerks Solldaten für die meisten Mercedes-Benz Pkw ab Baujahr 2009.
