Advantages of using wheel alignment machine (WAM)

The WAM API serves as the central data source for wheel alignment measurement for all current passenger car model series. It offers:

- **Fast vehicle identification**
  Vehicle identification in one step with FIN/VIN as the basis for accessing the specified suspension data.
- **Deviation analysis**
  Evaluates measured actual values of the suspension based on the expected values to determine required **adjustments.**
- **Current specified suspension data**
  Supplies the specified values and tolerances defined by the manufacturer for the suspension setting.

Technical requirements for ordering wheel alignment rights in XENTRY Shop

Technical requirements in oneAPI for ordering the WAM data interface via XENTRY Shop

The technical platform for connecting your chassis alignment system is oneAPI. For you, XENTRY Shop handles the ordering process in oneAPI up to and including approval.
The following conditions must be met:
1.) You have created or own a Dealer team (in oneAPI) that includes at least 2 people (one of them you).
2.) All members of the Dealer team have the necessary rights of use for oneAPI (org or market admin)

Link to oneAPI {Hub}- the API portal at Mercedes-Benz Group AG:
https://developer.corpinter.net/

*Link to oneAPI documentation **(for dealers**):*

Application for WAM usage rights

If you would like to use the **Wheel Alignment Machine** data supply for your wheel alignment system, you can place an order in XENTRY Shop for your company .

Link to XENTRY Shop on the Retail Platform
Mercedes-Benz Retail Platform • Powered by Workvivo

The rights of use for the wheel alignment machine can be obtained via the XENTRY Shop

Preliminary remark

Step 1:
You create a dealer team in oneAPI (if it doesn't exist)

Step 2:
All members of the Dealer team own the necessary rights for oneAPI in Alice

Step 3:
You order in XENTRY Shop

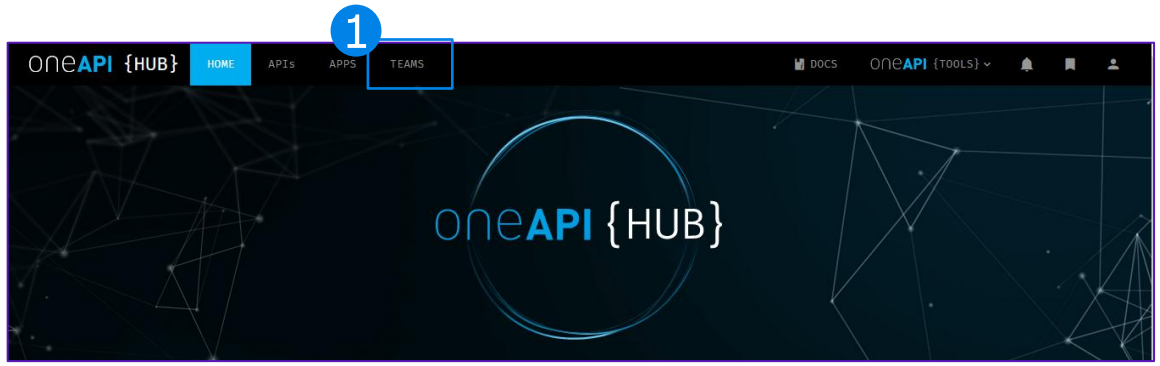

Step 4:
You log in to your chassis measurement system with the credentials you have received

Preliminary remark 1: Before ordering in XENTRY Shop, create a dealer team in oneAPI (if not already available; Teams in oneAPI can be used across all apps). The team must consist of at least two active members.

Important: To request rights of use for Wheel Alignment Machine (" subscribe "app), you need" Organization Administrator "or" Market Administrator "rights. (Market administrator rights are mandatory if you want to order for all outlets in your market)

Preliminary remark 2: You are authorized to place orders for the Wheel Alignment Machine product in XENTRY Shop

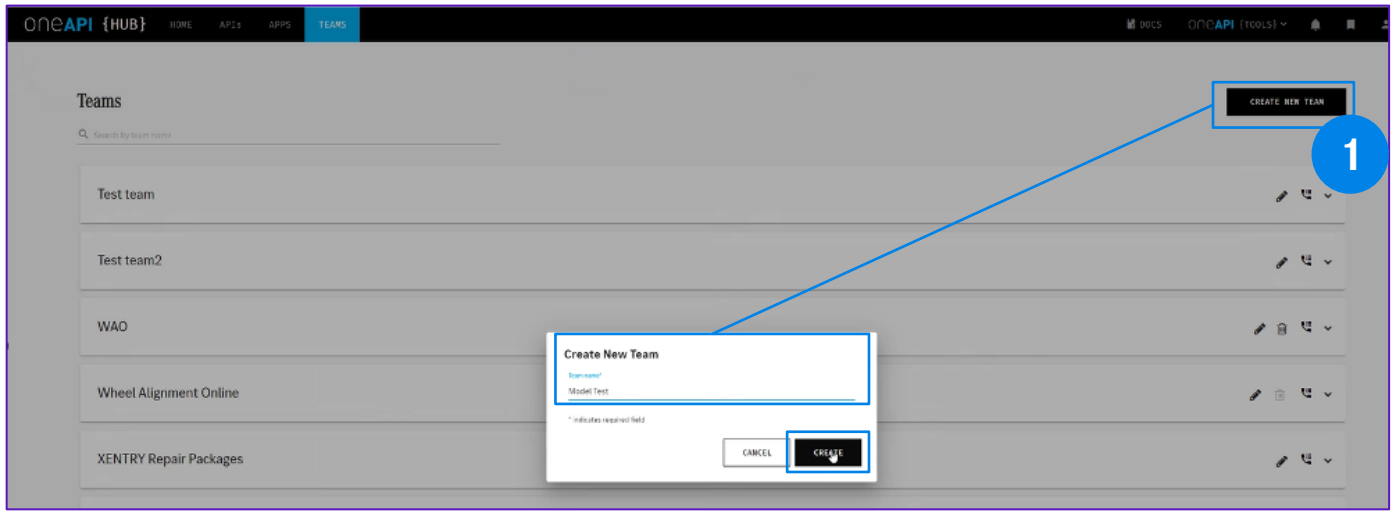

Start

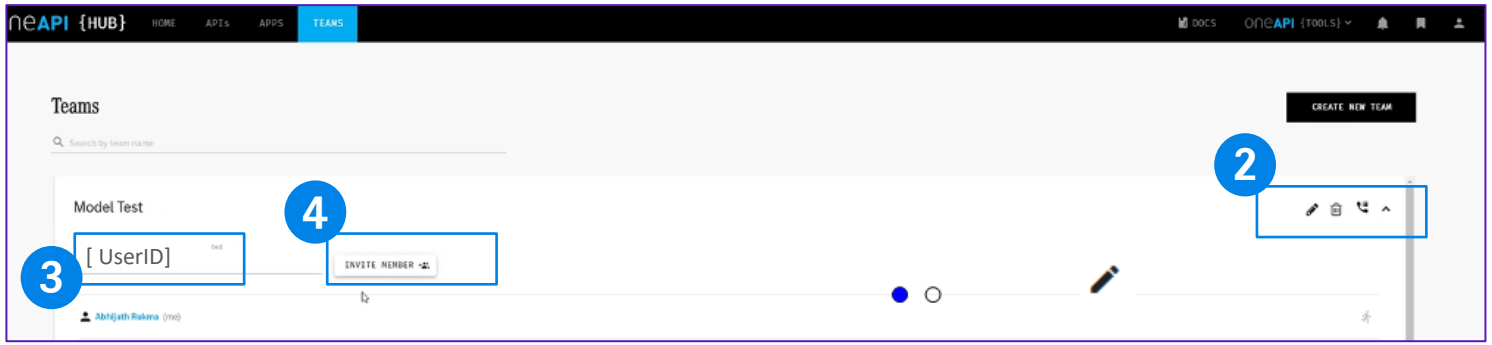

1 In oneAPI, select the "TEAMS" tab in the header navigation area to create a team.

Before you order the product in XENTRY Shop, you need a team in oneAPI.

Creating a team

1. In the subsequent view, click on " Create New Team " (make sure you have selected a Dealer Team) and enter the name of your team (freely selectable). Click on " CREATE" to generate your team.

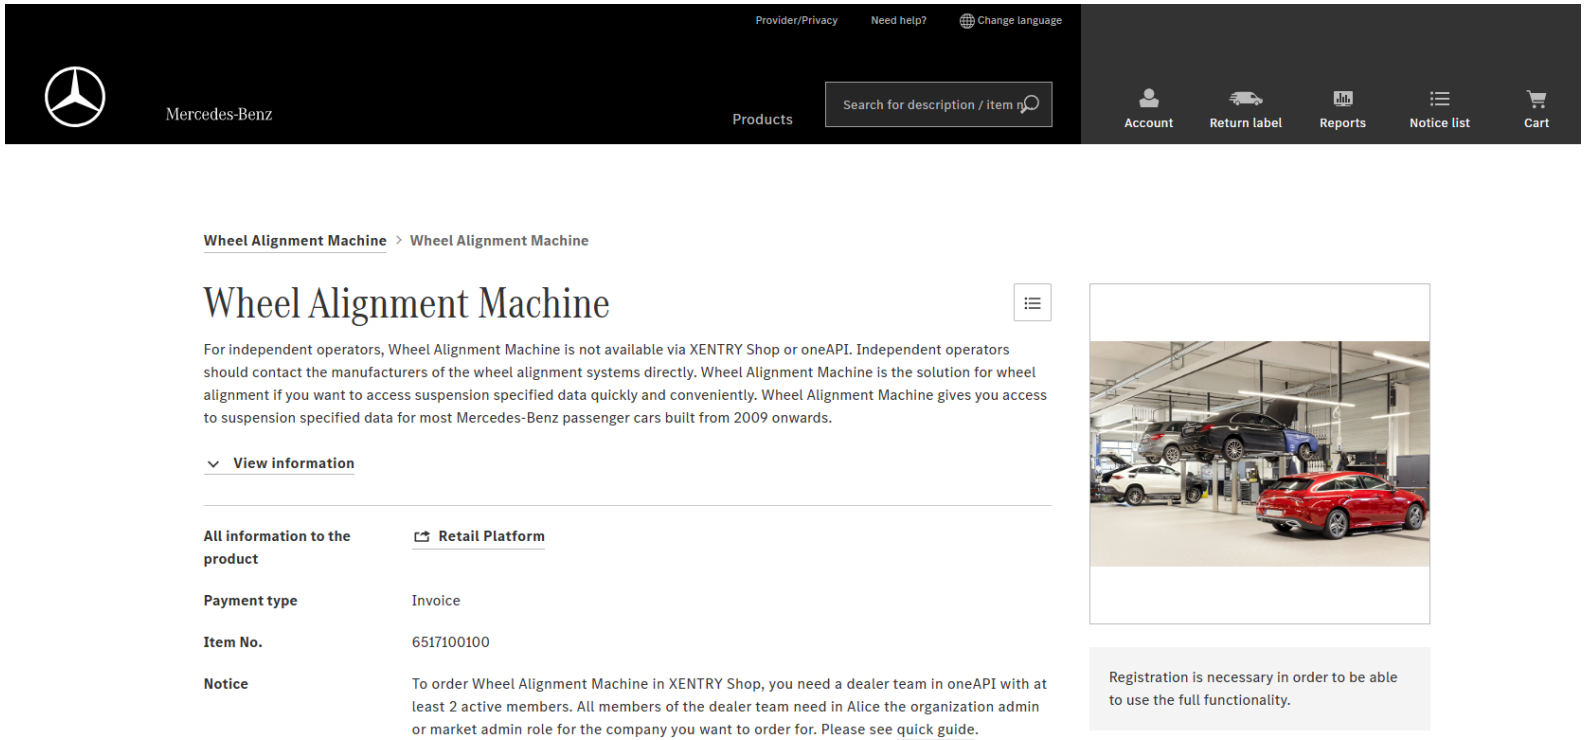

2. Please select your newly generated team from the list (here in the example: *Model Test*) and click on the *Edit Team* icon for editing:

3. To invite a new team member, please enter the person's user ID.

4. By clicking on " INVITE ", the invited person receives an info in oneAPI. However, it is **not automatically** informed of the invitation by e-mail, but only by means of a symbol in the oneAPI header: Request the person proactively (e.g. by email) to accept the **invitation** .

Important: Your team requires at least two active members who have the role of "organization admin or market admin" and are "active" members, i.e., have accepted the team invitation. The team must be a "Dealer" team!

The Wheel Alignment Machine product is ordered in XENTRY Shop

1. In XENTRY Shop, you can order for companies for which you either have order authorizations or for which your company is the invoice recipient.

2. Request authorizations for XENTRY Shop in UMAS.

3. Log into XENTRY Shop and go to the Product Detail page of Wheel Alignment Machine.

4. On the Detail page of Wheel Alignment Machine, select the company to which the product is to be delivered and your oneAPI team. Fill in the other properties.

Important: FAQs and training documents on the functions of the XENTRY Shop can be found directly in the XENTRY Shop under "Help required? ".
